

FOR IMMEDIATE RELEASE

**EXPEDIO TO SUPPORT NEW JUNIOR EXPLORER
TO GET THEIR DATA SORTED FROM THE BEGINNING**

PERTH, 25 July 2017: Expedio is proud to announce it has been appointed as data management provider for new junior explorer Cygnus Gold Limited.

Cygnus Gold Limited has contracted Perth-based Expedio to implement industry best practise data collection and management solutions ahead of their upcoming drilling program. Expedio will manage all geological data requirements for Cygnus including historic open source data from within their project areas.

Cygnus Gold Limited will benefit from outsourcing their IT infrastructure and staffing overheads while having the assurance their data is managed with the highest technical standards and combined centuries of experience from the expert team at Expedio. This support model ensures efficiency and immediate access to data, as well as the adherence to stringent business rules and statutory compliance.

Expedio's single interface data management solution integrated with centralised and standardised outputs and advanced reports ensure Cygnus Gold Limited is operating from a 'single source of truth' across divisions. Expedio's innovative data logging solution can be used even when offline, which means that Cygnus Gold Limited will be collecting fast, accurate and dependable data no matter what.

"Having access to immediate and accurate geological data delivered by excellent customer service is crucial for mining and exploration companies," said Lara Groves, Expedio Managing Director. "With an 18-year history of providing cost effective and successful solutions, we're confident Expedio will be delivering fantastic operational and compliance outcomes for Cygnus Gold Limited now and into the future."

"Cygnus Gold recognises that having a high quality database and data management systems is critical to the success of the company," said James Merrillees, Cygnus CEO. "Cygnus is pleased to team up with Expedio at this early stage and we look forward to working together as we build shareholder value through discovery success."
